1 Effets de la chirurgie bariatrique sur les complications hépatiques de l'obésité / The effects of bariatric surgery on hepatic complications of obesity

Schneck, Anne-Sophie 19 December 2014 (has links)

La sleeve gastrectomie (SG) est une opération qui consiste à réduire le volume de l'estomac. L'hypothèse que d'autres mécanismes indépendants de la perte de poids sont impliqués dans l'amélioration des complications métaboliques de l'obésité après SG a été émise. L'effet de la SG chez des souris soumises à un régime High Fat Diet a été étudié chez trois groupes d'animaux : SG, sham pair fed (SPF) et sham. Le test de tolérance au glucose montrait une amélioration de l'insulinorésistance des animaux SG à J23. Au niveau hépatique les animaux SG montraient une diminution significative de la stéatose. Il existe donc des mécanismes améliorant les complications hépatiques et métaboliques de l'obésité qui sont en partie indépendants de la réduction de l'apport calorique. Dans le second volet nous avons étudié l'évolution à long terme des lésions hépatiques liées à la NASH chez des patients obèses morbides avec une NASH lors de la chirurgie bariatrique. Dix patients d'une cohorte prospective ont été inclus. La deuxième biopsie a été réalisée à une médiane de 57 mois après le

Food & Nutrition Journals

Nutrition is the scientific study of the nutritional components of food and their physiological importance in the growth and maintenance of the body. Nutritional studies stress upon deciphering various steps and intricacies of food intake, its digestion, absorption and assimilation. Based on the information gathered from nutritional studies the nutritionist recommends the intake or avoiding of food items as per the dietary and physiological demand of the body. The food and nutrition research focus on diverse aspects by taking the socio-economic implications into account. It offers in-depth analysis on the nutritional values and dietary needs of the people, which is essential in the formulation of specific strategies to meet the global food security and prevention of diseases caused due to malnutrition.
